

ON THE ORIGINS OF GENDER ROLES: WOMEN AND THE PLOUGH (2013)

Alberto Alesina, Paola Giuliano, and Nathan Nunn

Southern Methodist University

January 31, 2024

Summary

- This paper examines the historical origins of less equal gender norms with an emphasis on traditional agricultural practice.

Summary

- This paper examines the historical origins of less equal gender norms with an emphasis on traditional agricultural practice.
- (Boserup's hypothesis)

Transition to plough cultivation

Summary

- This paper examines the historical origins of less equal gender norms with an emphasis on traditional agricultural practice.
- (Boserup's hypothesis)

Transition to plough cultivation

→ division of labor in productive work

Summary

- This paper examines the historical origins of less equal gender norms with an emphasis on traditional agricultural practice.
- (Boserup's hypothesis)

Transition to plough cultivation

→ division of labor in productive work

→ development of an environment less conducive to female labor participation

Summary

- This paper examines the historical origins of less equal gender norms with an emphasis on traditional agricultural practice.
- (Boserup's hypothesis)

Transition to plough cultivation

- division of labor in productive work
- development of an environment less conducive to female labor participation
- social norms about the role of women.

Evaluation

- Several papers explore gender norms from institutional, cultural, or religious perspectives.

Evaluation

- Several papers explore gender norms from institutional, cultural, or religious perspectives.
- This paper empirically demonstrated the significant role of plough cultivation as an origin explaining the formation of these perspectives.

Evaluation

- Several papers explore gender norms from institutional, cultural, or religious perspectives.
- This paper empirically demonstrated the significant role of plough cultivation as an origin explaining the formation of these perspectives.

- $y_c = \alpha + \beta \cdot \text{plough}_c + X_c^H \Gamma + X_c^C \Pi + \varepsilon_t$

e.g., controlling for religion: $\beta \downarrow$ by 20% but still significant (***)

- $y_c = \alpha + \beta \cdot \text{plough}_c + X_c^H \Gamma + X_c^C \Pi + \varepsilon_t$

e.g., controlling for religion: $\beta \downarrow$ by 20% but still significant (***)

Plough cultivation has extensive influences through transmission mechanisms.

Evaluation

- Plough cultivation - Men's comparative advantage - Formation of gender norms

Evaluation

- Plough cultivation - Men's comparative advantage - Formation of gender norms
- What were gender norms like even further in the past?

Evaluation

- Plough cultivation - Men's comparative advantage - Formation of gender norms
- What were gender norms like even further in the past?
- If ancient society also required strong physical abilities,
then the origins of the traditional gender norms started further before plough cultivation.
